

# Trio offering help in difficult times

**MARSTON** Green-based Isaacs Financial Services has teamed up with employee benefits sector expert Kevin Condon to form 3D Employee Benefits, a new company focused on providing employers with market leading employee benefits solutions.

Company director Kevin, who has over 20 years experience restructuring employee benefits for small to medium sized businesses, will spearhead the new business, supported by his co-directors, Jon Isaacs and Colin Prescott.

The new venture is a specific response to the current turmoil in the world's financial markets and the increasing likelihood that the global financial slowdown will send the British economy into a recession.

Mr Condon said: "The UK economy is taking a bashing right now and employers are looking to either save money or maximize the value and security of their current investments. 3D Employee Benefits offers employers a responsive and proactive service to ensure that employ-

● **Venture:** John Isaacs, Colin Prescott and Kevin Condon, all directors of 3D Employee Benefits.

ers are getting full value from their investment in their employee benefit schemes.

"With unemployment figures rising, it's a worrying time for employers and employees alike.

"During a period of recession it is vital that employers attract and retain the best people and keep their staff happy and motivated. 3D Employee Benefits helps employers to deliver the right benefits and solutions at the right cost, enabling them to become 'employers of choice'."

As part of their differentiated ser-

vice, 3D Employee Benefits is offering all businesses a free benchmarking service.

The service will allow employers to measure how their employee benefits scheme investment is performing and to compare their offering to that of their competitors.

For more information about the benchmarking service 3D Employee Benefits can offer, call 0121 779 1809 or visit [www.3demployeebenefits.com](http://www.3demployeebenefits.com).

## Download irritation

DOWNLOAD speeds have been voted the top irritation when using the internet.

Software developer, Acid's MD Michael Hawthornthwaite, said: "Long download times can hit the efficiency of a business."
